Andrew McAllister  
California Energy Commission  
516 Ninth Street, MS-31  
Sacramento, CA 95814

Dear Commissioner McAlister,

Clear-Wall Corp. supports the Commission's vision through insightful policy and investments in research and development like the Davis lighting center.

Clear-Wall is the developer of **Clear-Wall Solar Window Insert**, the highest performing energy saving retrofit for a window which supports your aggressive building energy efficiency standards.

As a manufacturer here in California we have worked closely with the California Lighting Technology Center to develop better product insights in this energy efficiency market place. We appreciate the opportunity to partner with the lighting center and believe strongly that the state should continue its investment in lighting research capabilities.

Sincerely,

**Normand Marchand, CEO**
